

biolog

Corporate Fact Sheet

Biolog produces the world's best solutions for functional cellular insights. We have the tools, services and support to enable the phenotypic characterization and microbial identification capabilities required by our customers to produce functionally relevant, repeatable, and actionable insights. We leverage the largest library of compounds, the largest database of organisms, and our unrivaled working knowledge of metabolic pathways and best-in-class services to identify and phenotypically characterize almost anything, even the weird stuff.

Biolog has over 5,000 publications demonstrating the value of our technology, and is a proven leader in phenotypic cell profiling, metabolic fingerprinting for microbial and mammalian cells and microbial identification. Headquartered in Hayward, CA, with an additional site in Newark, DE, the company's products and services enable characterization of microbial, mammalian cells and mitochondria as well as identification of thousands of species of bacteria, yeast, and fungi.

Products and Services

Phenotypic characterization offers invaluable cellular insights, and Biolog has continued to innovate and expand its offerings.

- **Odin™** - The all-in-one solution for phenotyping. Fully-automated metabolic characterization, growth kinetics, and microbial identification on one platform
- **Biolog Lab Services** - polyphasic microbial identification and confirmatory testing with unparalleled customer service
- **MicroStation™** - Semi-automated identification for classifying bacteria, yeast, and filamentous fungi
- **Phenotype MicroArrays™**
 - Microbial** - Screen for specific cellular phenotypes in over 1,900 unique conditions
 - Mammalian** - Investigate up to 1,400 metabolic and chemical sensitivity phenotypes of mammalian cells
 - Customizable** - Design your own phenotyping panel focused on your microorganism needs
- **Microbial Identification Test Panels**
 - GEN III** - Identify a broad range of gram-negative and gram-positive aerobic bacteria
 - Yeast** - Identify and characterize a broad range of yeast
 - Filamentous Fungi** - The first broad-based rapid identification and characterization product designed for filamentous fungi and yeast
 - Anaerobic Bacteria** - Identify a broad range of anaerobic and microaerophilic bacteria
- **Community Analysis Microplates**
 - EcoPlate™** - Monitor environmental changes in microbial communities
- **Reagents**
 - Microbial Detection using Chromogenic Media** - Rainbow® Agars are a simple selective and chromogenic medium
- **Software Solutions**
 - Sherlock Software** - Characterize your soil with Sherlock to automatically name all of the PLFA peaks

biolog

Management Team

- Robert Wicke, CEO and President
- Jason Novi, Chief Financial Officer and SVP Corporate Development
- John Proctor, Chief Commercial Officer
- Nick Fitton, SVP of Product Development
- Shawn Noble, SVP of Operations
- Sandy Almassou, SVP of Laboratory Services
