## Corporate Fact Sheet

Biolog produces the world's best solutions for functional cellular insights. We have the tools, services and support to enable the phenotypic characterization and microbial identification capabilities required by our customers to produce functionally relevant, repeatable, and actionable insights. We leverage the largest library of compounds, the largest database of organisms, and our unrivaled working knowledge of metabolic pathways and best-in-class services to identify and phenotypically characterize almost anything, even the weird stuff.

There are over 6,000 publications from the global research community demonstrating the value of our technology. Biolog is a proven leader in phenotypic cell profiling, metabolic fingerprinting for microbial and mammalian cells, and microbial identification. Headquartered in Hayward, CA, with an additional site in Newark, DE, the company's products and services enable characterization of microbial, mammalian cells and mitochondria as well as identification of thousands of species of bacteria, yeast, and fungi.

### Products and Services

Phenotypic characterization offers invaluable cellular insights, and Biolog has continued to innovate and expand its offerings.

- **Odin™ System** - The all-in-one solution for phenotyping. Fully-automated incubation and metabolic characterization, growth kinetics, and microbial identification on one platform with two options, Odin VIII and Odin L, covering the breadth of throughput needs.
- **ID Station™** - The new gold standard for phenotypic identification of a wide range of environmental and pathogenic microorganisms with a single microplate.
- **Phenotype MicroArrays™**
  - Microbial** - Screen bacteria, yeast, and fungi for specific cellular phenotypes in over 1,900 unique conditions
  - Mammalian** - Investigate up to 1,400 metabolic and chemical sensitivity phenotypes of mammalian cells
  - Customizable** - Design your own phenotyping panel focused on your needs
- **Microbial Identification Test Panels**
  - GEN III** - Identify a broad range of gram-negative and gram-positive aerobic bacteria
  - Yeast** - Identify and characterize a broad range of yeast
  - Filamentous Fungi** - The first broad-based rapid identification and characterization product designed for filamentous fungi and yeast
  - Anaerobic Bacteria** - Identify a broad range of anaerobic and microaerophilic bacteria
- **Community Analysis Microplates**
  - EcoPlate™** - Monitor environmental changes in microbial communities
  - PreBioM™ plates** - Profile metabolism of prebiotics to study human or animal gut microbiome communities

# biolog

- **Reagents**  
Microbial Detection using Chromogenic Media - Rainbow® Agars are a simple selective and chromogenic medium  
Anaerobic MediaMatcher™ plate and Biolog Synthetic Media™ - Overcome challenges of culturing complex obligate anaerobic organisms
- **Software Solutions**  
Sherlock Software - Characterize your soil with Sherlock to automatically name all of the PLFA peaks
- **Biolog Lab Services** - Polyphasic microbial identification, confirmatory testing, as well as service-based phenotypic characterization for customers who prefer to outsource their microbial work.

## Management Team

- Robert Wicke, CEO and President
- Alice Feng, Chief Financial Officer
- John Proctor, Chief Commercial Officer
- Nick Fitton, SVP of Product Development
- Shawn Noble, SVP of Operations
- Sandy Almassou, SVP of Laboratory Services

## Contact:

### **Biolog, Inc.**

21124 Cabot Blvd, Hayward, CA 94545
